Unit 7

All around the world
حول العالم

Kaieteur Falls, Guyana

In this unit I will

- ◆ understand environments around the world.
- ◆ learn about renewable and non-renewable energy.
- ◆ form and use the present continuous.
- ◆ read about different energy sources.
- ◆ understand the meaning of words in context.
- ◆ compare and order high numbers.
- ◆ talk about how to help the environment.
- ◆ make a competition entry to improve our environment.

Objectives

Vocabulary	Environments around the world: coastal, desert, mountainous, polar, rainforest, rural, urban A clean world: air pollution, carbon dioxide, climate change, emissions, fuel, water pollution Renewable and non-renewable energy: generate, geothermal energy, hydroelectricity, kilowatt, solar energy, store, tidal energy, tide, waterwheels, wind turbines
Language	<ul style="list-style-type: none"> - Today we're talking about pollution. - What are we doing to stop it? - Scientists are finding new ways to travel and to use fuels. - Context as clue to the meaning of a new word or phrase
Reading	Descriptions of environments; a scientific report about energy sources; a text about how our environment allows different energy sources
Writing	A report about hydroelectricity at the High Dam
Speaking	Talking about changes we can make to help the planet
Listening	A podcast about ways to reduce pollution; a conversation about how to help the environment
Life skills	Problem solving, accountability: the importance of helping the environment
Values	Appreciation of science Respect for the environment
Issues and challenges	Citizenship Environmental responsibility
Integrated cross-curriculum topics	Math: comparing and ordering high numbers

There are different environments in our world

1. Rainforest environment

There are lots of trees, plants, and flowers here. Lots of animals live in these places. For example, there are insects, birds, **reptiles** ①, and **mammals** ②. It often rains and the **temperature** ③ is hot.

2. Coastal environment

This environment is where the land is next to the sea. In some places there are beaches with sand, and sometimes there are **swamps** ④ and forests. The Nile Delta is an example, and so is the Red Sea.

3. Desert environment

It is very dry in this environment. The animals and plants that live here have to find clever ways to **survive** ⑤ without a lot of water. You can find these environments on every **continent** ⑥, and they can be hot or cold.

4. Rural environment

There aren't many houses or buildings here, so this place often has more animals and plants. Not many people live here, so it is **sparsely populated** ⑦. It can have lots of different kinds of weather, but it's a quiet place to live.

① زواحف ② ثدييات ③ درجة الحرارة ④ مستنقعات

⑤ تبقى على قيد الحياة ⑥ قارة ⑦ قليلة السكان

5. Polar environment

There are two of these environments in the world: the Arctic ⑧ and the Antarctic ⑨. It is cold and windy here, with a lot of ice. Some animals have found ways to live here, but there aren't any trees or flowers.

6. Urban environment

This is a metropolitan area ⑩ which is densely populated ⑪. Most people in the world live in this kind of environment. There are lots of buildings, and there can be a lot of traffic, too.

7. Mountainous environment

It can be difficult for people to live and travel in this high environment. They are very beautiful places, but they can be cold, with lots of rain or snow, and the weather can change quickly. The animals and plants that live here have to find special ways ⑫ to survive.

⑧ القطب الشمالي ⑨ القطب الجنوبي

⑩ منطقة العاصمة ⑪ كثافة السكان ⑫ طرق كاسية

Exercises on Lesson 1

1 Read and complete the text with the words from the box:

sparsely - densely - buildings - metropolitan

The urban environment is a ① area. It is ② populated. Most people in the world live in this kind of environment. There are lots of ③, and there can be a lot of traffic, too.

2 Read and complete the text with the words from the box:

Arctic - survive - continent - environment

It is very dry in this ❶ The animals and plants that live here have to find clever ways to ❷ without a lot of water. You can find these environments on every ❸, and they can be hot or cold.

3 Read and complete the dialogue with the words from the box:

coastal - desert - environments - urban

Ehab : What are you doing, Fady?

Fady : I'm reading a book about different ❶

Ehab : What's your favorite environment?

Fady : The ❷ environment.

Ehab : Why?

Fady : Because there are lots of buildings, clubs, parks and other interesting places. What about you?

Ehab : I like the ❸ environment.

Fady : Why?

Ehab : Because I like living next to the sea.

4 Choose the correct answer:

1. Lots of trees, plants, flowers and animals live in the (urban - polar - rainforest) environment.
2. The (rural - mountainous - desert) environment is a very high environment.
3. In the (coastal - rainforest - desert) environment, the land is next to the sea.

4. In the (urban - rural - polar) environment, there are lots of buildings, and there can be a lot of traffic, too.
5. It's very dry in the (rural - polar - desert) environment.
6. The Arctic and the Antarctic are (coastal - rainforest - polar) environments.
7. The (desert - urban - rural) environment often has a lot of animals and plants.
8. Africa is the (country - continent - city) where we live.
9. The desert environment is (sparsely populated - densely populated - full of people).
10. There are (traffic - ice - swamps) in the coastal environments.
11. Lots of animals have to find clever ways to (die - run - survive) in the polar and desert environments.
12. Cairo is a (sparsely populated - densely populated - not populated) city.

5 Read the following text and answer the questions below:

There are lots of trees, plants, and flowers in the rainforest environment. Lots of animals live in these places. For example, there are insects, birds, reptiles, and mammals. It often rains and the temperature is hot. The coastal environment is where the land is next to the sea. In some places there are beaches with sand, and sometimes there are swamps and forests. The Nile Delta is an example, and so is the Red Sea.

A Choose the correct answer:

1. Sometimes there are beaches with sand in the (rainforest - polar - coastal) environment.
2. Trees, plants and flowers grow when there's a lot of (rain - wind - storm).

B Answer these questions:

3. Where can we find the coastal environment?

▶

4. What's the weather like in the rainforest environment?

▶

6 Order the words to make correct sentences:

1. environment - often - **It** - rainforest - rains - in the.

▶

2. is - **The** - populated - rural - sparsely - environment.

▶

3. environment - do - in - **What** - live - you?

▶ ?

4. in - very - **It** - is - desert - dry - the.

▶

5. be - **Deserts** - hot - can - cold - or.

▶

6. urban - densely - **The** - is - populated - environment.

▶

7 Write a paragraph of (40) words using the following guiding elements:

"My environment"

▶ Ideas to help you:

- ▶ *What kind of environment do you live in?*
- ▶ *What are the good and bad things about it?*
- ▶ *What kind of plants and animals are there in your environment?*

S B Student's Book

water pollution	: when water is dirty because of chemicals or plastic
air pollution	: when the air is dirty; this can make people or animals sick
carbon dioxide	: a gas in the atmosphere known as CO ₂ . It can be dangerous when there is too much in the air
emissions	: these are made, for example, by factories, cars and lorries; they can cause air pollution
climate change	: when the weather and temperature change over a long period of time
fuel	: this is something we burn to make heat or power

Woman 1 : Hello, and welcome to our Clean World podcast ❶! We live in an amazing world, but the things that people do can damage ❷ the environment ❸. Today we're talking about pollution - what is it, and what are we doing to stop it?

Woman 2 : There are two main types of pollution - air pollution ❹ and water pollution ❺. Air pollution is caused by the things that people do, such as driving cars and trucks, or making things in factories ❻. When we burn fuels, it makes carbon dioxide emissions ❼. Over a long time, this can lead to ❽ climate change, because there is too much carbon dioxide in the atmosphere ❾. Things in the natural world, such as forest fires, or volcanic eruptions ❿, can also cause air pollution. Chemicals from factories or farms go into rivers or the sea to cause water pollution. There is also a problem with plastic pollution - there's a lot of plastic garbage ⓫ in rivers and oceans, and this is very bad for the animals that live there.

Woman 1 : Today, we know more about pollution than we used to, and we know how important it is to reduce ❶ it. Scientists are finding new ways to travel and to use fuels. We can also change the things we do - for example, we can walk, cycle or use public transportation instead of ❷ using cars. We also need to think about how we can use less plastic. Lots of people are trying to make our world a cleaner place!

A plastic bottle can be in the sea for over 400 years before it disappears. It's important to recycle plastic, not throw it away!

يمكن للزجاجة البلاستيكية أن تبقى في البحر لأكثر من 400 عام قبل أن تختفي. لذا فمن المهم أن نعيد تدوير البلاستيك بدلاً من رميه.

Energy around us

Fossil fuels ❶ are things like coal, gas and oil. These are burned in factories or used to make homes and buildings warm. However, they are non-renewable ❷: when they run out ❸, we can't find or make more of them. Fossil fuels are made from the remains ❹ of very old plants and animals that lived on Earth a long time ago. When we burn them, a lot of carbon dioxide is released ❺ into the atmosphere.

- ❶ الوقود الأحفوري
- ❷ غير متجددة
- ❸ ينفذوا
- ❹ بقايا
- ❺ يطلق - تبت

There are other kinds of energy we can use which are **renewable** ⑥: they don't run out. We can get renewable energy from **natural resources** ⑦ such as the wind, the sun, water, and heat inside the Earth. These kinds of energy don't make pollution, and, **on the long run** ⑧, they are better. There are many types of environments on Earth, and we can use different natural resources in different places. For example, a hot desert is a good place to get **solar energy** ⑨ from the sun, and there are large farms with lots of **solar panels** ⑩ that can make clean **electricity** ⑪. A coastal environment can get a lot of wind, so some places have a lot of **wind turbines** ⑫ in the sea, close to the coast. In some places, the sea goes up and down throughout the day. This is called a **tide** ⑬. In places where the tides are very big and strong, we can use **tidal energy** ⑭ from the moving water to make electricity. Wind and wave turbines work **by movement** ⑮. The wind or water make turbines move, and this moving energy generates electrical energy. You can store this energy, so if the sun isn't shining or the wind isn't blowing, we will still have electricity. In other places, it is very hot under the ground. These are good places for **geothermal energy**, as the ground can heat water.

In the future, we need to get more of our energy from renewable sources, and less from non-renewable sources.

Exercises on Lesson 3

1 Read and complete the text with the words from the box:

burned - remains - coal - fuels

Fossil ① are things like coal, gas and oil. These are ② in factories or used to make homes and buildings warm. However, they are non-renewable: when they run out, we can't find or make more of them. Fossil fuels are made from the ③ of very old plants and animals that lived on Earth a long time ago.

2 Read and complete the text with the words from the box:

solar - tidal - Renewable - fossil

When we burn ① fuels like coal, gas, and oil, carbon dioxide goes out into the atmosphere. This causes air pollution and make climate change worse. ② energy from natural resources is better for the environment and it won't run out. Some countries have a lot of coastal environments and they can create ③ energy using the movement of the sea.

3 Choose the correct answer:

- Coal, gas and oil are (renewable energy - solar energy - fossil fuels).
- The (renewable - non-renewable) energy will run out one day.
- A hot desert is a good place to get (tidal - wind - solar) energy.
- The renewable energy doesn't make (electricity - pollution - power).
- When we burn fossil fuels, a lot of carbon dioxide is (released - decided - worked) into the atmosphere.

6. We can get (tidal energy - solar energy - wind energy) from moving water.
7. The sun, wind and water are natural (turbines - fuels - resources).
8. We get (geothermal - solar - wind) energy from the heat under the ground.
9. The wind energy is a (renewable - non-renewable) energy.
10. When there's a lot of wind, we can get (wave power - wind energy - solar energy).
11. A turbine is a (source of energy - machine to make energy). [S B]
12. To generate is to (make - use) energy. [A B]
13. In some places, the sea goes (up and down - right and left) throughout the day. This is called a tide. [S B]
14. To store is to (make - keep) something for a period of time. [A B]
15. A tide is when (the level of the sea gets higher or lower - the sea gets hotter or colder). [S B]

4 Read the following text and answer the questions below:

There are many types of environments on Earth, and we can use different natural resources in different places. For example, a hot desert is a good place to get solar energy from the sun, and there are large farms with lots of solar panels that can make clean electricity. A coastal environment can get a lot of wind, so some places have a lot of wind turbines in the sea, close to the coast. In some places, the sea goes up and down throughout the day. This is called a tide. In places where the tides are very big and strong, we can use tidal energy from the moving water to make electricity.

A Choose the correct answer:

1. A hot desert is a good place to get (geothermal - solar - wind) energy from the sun.
2. Some places have a lot of wind (turbines - fuels - environments) to get energy.

B Answer these questions:

3. How can we get electricity from the solar energy?

▶

4. What can you do with the tidal energy?

▶

5 Order the words to make correct sentences:

1. energy - make - The renewable - pollution - doesn't.

▶

2. wind - A coastal - get - environment - can - a lot of.

▶

3. from - fuels - What - made - fossil - are?

▶ ?

4. work by - wave - and - Wind - movement - turbines.

6 Read and choose the correct answer, a, b, or c:

1. A turbine is

a. the power of the wind

b. a machine that makes energy

c. a form of energy

2. A turbine generates electrical energy by

a. burning fossil fuels

b. using the heat underground

c. using the power of wind or water

3. If you store a type of energy, you can

a. keep it for a period of time

○ A report is a way to give information about a topic. It often has these features.

A title - this tells you what the report is about.

Photos - these illustrate the report and make it look interesting. A photo can help explain what you mean.

Subtitles - these break down the information into smaller sections by topic.

Facts and figures - a report uses these to show that information is true.

○ التقرير هو طريقة لإعطاء معلومات عن موضوع معين. غالبًا ما يحتوي التقرير على الأركان الآتية:

العنوان الرئيسي: وبخبرنا عن الموضوع الذي سيتناوله التقرير.

الصور: وهي تفسر التقرير وتجعله يبدو شيقًا، فالصورة يمكن أن تساعد في توضيح وشرح ما تقصده.

العناوين الفرعية: وهي تُقسّم المعلومات إلى أجزاء أصغر على حسب الموضوع. **الحقائق والأرقام:** يستخدم التقرير الحقائق والأرقام ليوضح أن المعلومات التي يسردها حقيقية.

Report: Geothermal Energy, Iceland

Why Iceland?

Iceland is a cold country, but it has more than 600 hot springs ❶ and 200 volcanoes ❷. There is a lot of hot water underground ❸, and this is used to heat homes and to make electricity.

How does it work?

When water gets hot, it makes steam.

Engineers ❹ in Iceland can make holes ❺ down to the hot water underground. Then steam ❻ comes up and it moves turbines to make electricity.

Why is it important?

100% of its electricity and heat comes from renewable sources.

Hydroelectricity

People have used hydroelectricity ❶ (also called hydropower) for a very long time. Hydroelectricity means using the energy from moving water to move machines or generate electricity. The Ancient Egyptians and Greeks ❷ used the energy in moving water to turn the waterwheels ❸. The waterwheels could move machines and these machines helped with both farming and making food.

Now, we can use hydroelectricity to generate electricity. A hydroelectric dam uses the energy in falling water to turn a turbine. The mechanical energy ❹ of the moving turbine is changed to electrical energy ❺ by a generator ❻.

The High Dam was finished in 1971. It uses water from the River Nile to generate electricity. The location ❼ of Aswan made this a good place to build the dam, because it could stop the River Nile from flooding ❽. The dam has twelve large turbines inside. It generates more than 10 billion kilowatt hours of electricity a year!

Exercises on Lesson 4

1 Read and complete the text with the words from the box:

electricity - waterwheels - Hydroelectricity - Fossil fuels

People have used hydroelectricity for a very long time. ① means using the energy from moving water to move machines or generate ② The Ancient Egyptians and Greeks used the energy in moving water to turn the ③ The waterwheels could move machines and these machines helped with both farming and making food.

2 Read and complete the text with the words from the box:

underground - volcanoes - electricity - springs

Iceland is a cold country, but it has more than 600 hot ① and 200 volcanoes. There is a lot of hot water ② , and this is used to heat homes and to make ③

3 Read and complete the dialogue with the words from the box:

Fossil fuel - finish - electricity - Aswan

Kareem : What's this picture, Ahmed?

Ahmed : It's a picture of the High Dam.

Kareem : Do you know where it is?

Ahmed : Yes. It's in ①

Kareem : When did they ② building it?

Ahmed : It was finished in 1971.

Kareem : How can it be useful?

Ahmed : It uses water from the River Nile to generate ③

4 Choose the correct answer:

1. Iceland is a cold (country - continent - city).

2. We can get water from (volcanoes - generators - springs).

3. It's very hot inside (rivers - volcanoes - dams).
4. When water gets hot, it makes (ice - snow - steam).
5. We can get (hydroelectricity - solar energy - wind energy) from moving water.
6. The mechanical energy is changed to electrical energy by a (generator - panel - waterwheel).
7. The (flooding - location - turbine) of the High Dam is in Aswan.
8. The High Dam stops the River Nile from (watering - generating - flooding).

5 Order the words to make correct sentences:

1. more - Iceland - has - than - hot springs - 600.
▶
2. is - underground - a lot of - water - There - hot.
▶
3. electricity - hydroelectricity - We - use - can - to generate.
▶
4. finished - was - The - in - 1971 - High Dam.

Planting trees

'Listen to this, Mom,' said Nessma one day after school. 'This article says that in 2019, Egypt started a project to plant one million trees in public parks and gardens all over the country. That's amazing!'

'You're right,' said Mom. 'Do you understand why it's important to plant trees?'

Nessma wasn't sure. 'They look really nice, don't they? They give us fruit, and they can be homes for animals.'

'All those things are true, but trees are even more special than that,' said Mom. 'Some of the things that people do make carbon dioxide emissions. This causes air pollution and climate change. But forests can absorb carbon dioxide. That means they take it out of the atmosphere and make the air cleaner! Did you know that forests absorb about 2.6 billion tonnes of carbon dioxide every year?'

'Wow, that's a lot of carbon dioxide!' said Nessma. 'So trees are really important in protecting our planet!'

Listening

So, the first question is: What can our country ① do to help the environment? That's interesting. I think our country can help by using more renewable energy ②.

① بلدنا - دولتنا

② الطاقة المتجددة

I agree. That would be a good way to use less fossil fuel ③. I also think it's a good idea to plant more trees and protect the forests we have.

③ الوقود الحفري

④ في حماية

⑤ يُلْقَى القمامة

Yes, you're right. Forests help to protect ④ the environment.

⑥ تطفئ الأنوار

⑦ تُهدر الكهرباء

And what can I do to help the environment? Well, I can recycle plastic and not drop garbage ⑤.

Yes, we shouldn't drop garbage, but I think the most important thing is to turn off lights ⑥ and not waste electricity ⑦.

○ When you work in pairs, take time to listen to your partner. Say if you agree or disagree. You can use phrases like these:

► I agree.

► I'm not sure.

► I disagree.

○ عندما تعمل مع شخص آخر، خذ وقتك لتستمع إلى شريكك في العمل، وأخبره ما إذا كنت تتفق معه أو لا تتفق معه، ويمكنك استخدام عبارات كالعبارات الآتية:

◀ أنا لا أتفق معك.

◀ أنا غير متأكد.

◀ أنا أتفق معك.

Make our town a better place!

Our town is a great place to live, but what can we do to make the environment here better?

Do you want more green spaces to play in, cleaner streets, or less traffic? Make a poster with your ideas. There's a prize for the best idea!

Exercises on Lessons 5 6

1 Read and complete the conversations:

I agree - I disagree - I'm not sure

A : Fossil fuels are cleaner than renewable energy.

B : ① . I don't think that's right.

A : I think it's better to recycle plastic than glass.

B : ② . I think they are both important.

A : I think we should turn off lights and not waste electricity.

B : Yes, you're right. ③ .

2 Choose the correct answer:

1. We should (burn - plant - cut) trees. We need more trees everywhere.

2. The Earth is the (plane - planet - plant) where we live.

3. It's important to (protect - pollute - breathe) our environment.

4. Trees (absorb - generate - release) carbon dioxide.
5. Your (brain - head - heart) beats about 35 million times a year.
6. Turn (on - of - off) the lights when you leave the room.
7. You shouldn't drop (garbage - trees - ideas). Put it in the bin.
8. It's important not to (turn on - use - waste) electricity.

3. Read and complete the dialogue with the words from the box:

renewable - plant - fossil fuel - environment

Tamer : What can our country do to help the ❶

Hazem : That's interesting. I think our country can help by using more ❷ energy.

Tamer : I agree. That would be a good way to use less fossil fuel. I also think it's a good idea to ❸ more trees and protect the forests we have.

Hazem : Yes, you're right. Forests help to protect the environment.

4. Write the numbers. Then put them in the correct order from the smallest (1) to the biggest (7)

a ten thousand

b one million

c one hundred million

d one thousand

e one billion

f one hundred thousand

g ten million

5. Order the words to make correct sentences:

1. trees - plant - How many - Egypt - will?

Adverbs of frequency ظروف التكرار

■ We can use adverbs of frequency with the present simple to say how often something happens. They can help to describe habits or routines.

◀ يمكننا استخدام ظروف التكرار مع المضارع البسيط لنقول كم عدد مرات تكرار حدوث شيء ما. يمكن أن تساعد ظروف التكرار في وصف عادات أو أفعال متكررة الحدوث، مثل:

always 100% We **always** eat Fatta with bread.

usually 80% Faten is **usually** early for school.

often 60% I **often** share recipes with family.

sometimes 30% We **sometimes** eat Hawawshi with salad.

never 0% Ful Medames **never** has any meat in it.

■ We use these words before the main verb or after (**verb to be**).

◀ نستخدم هذه الكلمات قبل الفعل الأساسى أو بعد (**verb to be**).

- Fatta **always** has layers of rice and bread.
- We **usually** eat Ful Medames for breakfast.
- Hawawshi is **often** made with bread and beef or lamb.
- People **sometimes** eat Hawawshi with salad.
- I'm **never** ready to go out on cold nights.

Why did people wear different clothes?

Presenter: Hello and we come to Radio Now ①.
What did people wear in the past, and what are they wearing now? Today I'm talking to Dr Samir today about clothes in Egypt - Hello, Dr Samir!

Dr Samir : Hello!

Presenter: So, when we think about ancient Egyptian clothing ②, it's often quite simple ③, isn't it?

Dr Samir : Yes, that's right - we have lots of old paintings that show people wearing loose white linen ④. White is a good color to wear in hot weather, and loose linen clothes help to keep you cool.

Presenter: I see - and what other things did people wear at that time ⑤?

Dr Samir : Many ancient Egyptians wore sandals on their feet ⑥. These were made from leather. And they wore lots of jewelry ⑦, too. It was important to look beautiful.

Presenter: So how are things different today?

- ② الملابس المصرية القديمة
- ③ بسيط إلى حد ما
- ④ الكتان الأبيض الفضفاض
- ⑤ في ذلك الوقت
- ⑥ في أقدامهم
- ⑦ مجوهرات

Dr Samir : Well, there's a lot more color in traditional Egyptian clothing today, but many people still prefer loose clothing. In some parts of Egypt, it is traditional for men and women to wear the galabeya, which is long and loose, with long sleeves ⑧. Men sometimes wear a striped ⑨ kaftan over this with a hizam, which is a colored sash ⑩ around their body. Men and women also wear items ⑪ on their heads such as scarves ⑫ or different styles of hats. In some cities, though ⑬, men and women often wear more modern clothes, such as trousers and shirts, or dresses and skirts. too. It was important to look beautiful.

A traditional Egyptian meal is served with people sitting together around a table. A typical meal has rice, a kind of vegetable stew, soup, stuffed vegetables, and meat or chicken. Egyptians are very generous and are very happy when you ask for more food.

This means you enjoyed their delicious meal! Some Egyptian festivals have traditional food, too. At Eid Al-Fitr, people bake special cookies called kahk, with sugar on top. At Sham El-Nessim, people eat dried salted fish, called fesikh. If you visit Egypt at these times, you should try these dishes!

The Abu Simbel Sun Festival

Near Aswan, you can see the temples of Abu Simbel. Outside the temples, there are some very big statues of Ramses II and his wife Nefertari. Twice a year, people celebrate the Abu Simbel Sun Festival there, on February 22nd and October 22nd. On these days, light from the sun at sunrise shines

Fables and folklore are types of stories that are passed down from one group of people to another group of people. They teach us a lesson or "moral", and are often about animals, plants or things that happen in nature. There are many stories from ancient Egypt.

الأساطير (القصص الغير حقيقية) وقصص التراث الشعبي هي أنماط من القصص والتي تنتقل من مجموعة من الناس إلى مجموعة أخرى من الناس. إنهم يعلمونا درس أو عظة وهم في الغالب عن الحيوانات أو النباتات أو الأشياء التي تحدث في الطبيعة. يوجد الكثير من القصص من مصر القديمة.

ملحوظة هامة

عند استخدام الحيوانات أو الطيور كشخصيات في القصة نعاملهم معاملة العاقل أي الضمائر التي تعود عليهم هي (He - She) أو (him - her).

Long ago, the King asked an important man to leave Egypt for a special job. The man traveled with many other sailors, but he wasn't **successful** ❶. When he returned, he was frightened about what the King would say. His **servant** ❷ spoke to him.

'You must tell the King that you **tried your best** ❸,' he said.

'I don't want to say that I was not **successful**,' said the man.

'Listen to my story,' said the servant. 'I was a sailor, too. I went on a journey for the King with the best sailors in the country. But a **storm** ❹ came, and our ship sank. I fell into the sea, and swam to an island. I was alone and frightened. Then, I **looked for** ❺ food, and the island had food, water, and everything I needed.'

Another storm began. I saw a giant snake ⑥ in the waves ⑦. His body was gold and his eyes were bright blue. I fell down as he spoke.'

'How did you get to this island?' said the snake. 'I couldn't speak.' The snake put me in his mouth and took me to the place where he lived. He asked me again how I got to the island, so I told him about the shipwreck ⑧.

'Don't be frightened,' said the snake. 'You'll stay on the island ⑨ for four months, and you'll be safe. Then people will find you and take you home. Be patient ⑩, and you'll return to your family.'

Then the snake told me what happened to him.

'Long ago, I lived on the island with my children and brothers. A star fell, bringing a terrible fire ⑪. I was the only one to live. But I stayed strong and patient, and things became better ⑫.'

'Thank you,' I said. 'When I get home, I will send you many presents.' The snake laughed. 'I don't need your presents. I have everything I need here.'

'I was on the island for four months, then a ship came, just as the snake said. The snake gave me special presents to take home.'

'Tell people in your city about me,' he said.

'I returned to my family, gave the presents to the King, and he was pleased ⑬. So, listen to my story. I was in a terrible place, but now I'm safe.'

The man heard the story, and smiled.

A **vlog** ⑫ is similar to a blog because it is a personal website where people post information for others. The difference is that on a vlog, people post videos they make instead of **written texts** ⑬.

Listening

Teacher:

When you read blogs, watch vlogs, or take information from websites, it's very important to decide how **reliable** ① the information is.

① مصداقية

First, look at the **date of the material** ②. You don't want to choose anything that is very old because the information may be different or even **incorrect** ③ now.

② تاريخ المحتوى

③ غير صحيح

Make sure ④ you think about the person who created the **material** ⑤. Is she or he an **expert** ⑥ or a **professional** ⑦, or just someone **giving their opinion** ⑧? **Basically** ⑨, you want to get facts. Check Vocabulary from experts. So, if they are using phrases like "I guess" or "I feel," they are **probably** ⑩ just giving their opinion.

④ تأكيد

⑤ منع المحتوى

⑥ خبير

⑦ محترف

⑧ يبدون رأيهم

⑨ في الأساس

⑩ من المحتمل

⑪ مراجعة الحقائق

You can also use special websites that are used for **checking facts** ⑪. There are a lot of different ones online, and they can help you decide what true and what's not. Ask your teacher which ones you should use.

'Hi Mom,' Adam said. 'Do you want to read my new story?'

'Of course I do, honey.'

Adam handed his notebook to his mom. She sat down and started reading it. After a while, she said, 'This is an incredible story, Adam. You should let more people read it.'

'What do you mean?' Adam asked.

'You know, you should prepare it to share with others.'

'OK, but how do I do that, Mom?'

'First you should touch type it.'

'OK, we're learning how to type at school. Is that when you try to type without always looking at the keyboard?'

'That's right. It might sound difficult, but if you practice, you'll get better and better at it. It's much quicker than writing with a pen, and it's easier to correct or change your work.'

'I can do that, Mom.'

'Just remember to sit up straight and keep your feet on the floor. You don't want to hurt your neck or back. And take a break every 10 or 15 minutes.'

'Yes, that's what my teacher told us,' said Adam.

'Then, you can ask the school to publish it in the school newspaper, or even publish it yourself online.'

His mom handed the notebook back to him. 'Look at the last page. I made a checklist for you.'

Dear Editor,

I am writing because I think we should open a social media account for the fourth grade students. Will you help us?

We could use our social media account to write about life in the fourth grade. We could write about school or life in general. We would like to interview students in fifth and sixth grade. Some of my friends would like to post their photos and videos. My other friends would like to create games, puzzles, and artwork.

A social media account would be fun and could improve our technology skills at the same time.

We could use our social media account to contact fourth grade students in different countries. We could ask students to send us articles about life in their country.

We could learn a lot about different cultures, but we need to learn how to use the internet safely first. I think this is a great idea and I hope you agree. Can you help us?

That is what we call outdoor pollution. But most people don't realize that there is also indoor pollution - that is the pollution that is inside of our homes, schools, and offices. But let's just talk about outdoor air pollution today. This is produced by our cars, buses, airplanes, factories, and power plants. We must also remember that there is some dust from the desert in the air. But when we burn fossil fuels, we make air pollution worse. And since it doesn't rain very much in Cairo or other areas of the country, the air doesn't get cleaned.

Presenter

: So, how can technology help us deal with this problem?

Dr. Nesma Hegazy : Fortunately, there are a couple of ways. First of all, there are electric cars. There aren't many on the streets now, but you will definitely

see more and more of these in the future - the government has already started helping car companies start producing electric cars.

Presenter

: That's good news.

Dr. Nesma Hegazy

: Then there are devices called scrubbers. You can find them on the smokestacks of some factories or power plants.

These devices are used to clean some of the gases coming from the factories. They remove the dangerous parts of the gases and make it safe to store or use them in some other way.

Presenter

: That's fascinating!

Dr. Nesma Hegazy

: Yes, it is. We also have smog free towers. These are like giant vacuum cleaners that take polluted air in, clean it, and then send it back out for us to breathe. These 7-meter towers can only clean air in a small area like a park. So, we would need a lot of them to clean an entire city. However, some are already being used in China, Mexico, and the Netherlands.

Presenter

: That's really interesting. What do they do with the pollution they collect?

Dr. Nesma Hegazy

: You might be surprised to hear this, but they use it to make fashionable jewelry.

Presenter

: Really? Wow. I am impressed. Thank you so much for talking with us today, Dr. Hegazy.

Book

Air pollution is one of the biggest problems for people's health. Air pollution is created by airplanes, traffic, factories, and power plants. When we burn fossil fuels and use strong cleaning chemicals to clean our houses, we create pollution. However, there are some new and exciting ways to solve the problem of air pollution.

We have learned about scrubbers and smog free towers that help to clean gases and pollution produced by factories and industry. Another method which is becoming popular is called greening. Greening is growing a wall of plants on the side of a building.

Why is this helpful? The plants help to clean the air because they absorb carbon dioxide and they produce oxygen. The plants also catch dust and other harmful pollution. In hot countries, the green walls provide shade and help to cool the air. The cool air stops the buildings from getting too hot in summer. The plants keep the buildings warm in winter. The cooler temperatures are also easier for people to live in. The plants also provide homes for bees, insects, and birds, so greening helps nature, too.

1. What causes air pollution?

2. How do scrubbers and smog free towers help air pollution?

3. What is greening?

4. How does greening help air pollution?

5. How is greening helpful in hot countries?

6. How does greening help nature?

Transportation

المواصلات في الماضي

Transportation is the way that people move from one place to another. It is also the way that people move things from one place to another. A long time ago, the only types of transportation for humans were walking, running, and swimming.

After that, humans began to use animals like **muies** ❶, donkeys, and horses. Then came small boats like canoes and other types of water transportation. **Once** ❷ they invented the **wheel** ❸, people started to use small **wagons** ❹ and carts. Farmers in the country could transport their **goods** ❺ to markets in cities more easily. In rural areas, many people still use these means of transportation today. The **invention** ❻ of the **steam engine** ❼ changed transportation. Ships with steam engines could travel much faster than using people or the wind to move boats.

The first steam train was in Wales in the 1800s. The train made trips between rural and urban areas faster and safer. The first car that ran on gasoline ⑧ also appeared in the 1800s. People bought cars to make their lives ⑨ easier. Cities like London and Boston had some of the first streetcars ⑩ and subway systems. The subway in London opened in 1863. Soon, high-speed trains made traveling between rural and urban areas very fast. From the beginning of time, humans watched birds and wanted to fly through the skies. Today, we fly from one continent to another in no more than one day. We are even able to send people to the Moon in rockets.

The problem with transportation that uses gasoline is that it burns fossil fuels, and these are bad for the environment. So today, people are developing cleaner forms of transportation like electric cars. There are even electric buses that use some solar energy from solar panels on their roofs. Engineers are designing ⑪ greener airplanes and ships, too.

Activity Book-Text AB

Transportation in ancient Egypt

In ancient Egypt, the most important highway ① was the River Nile. The Egyptians traveled mostly along the river because all the major cities were along the River Nile. So boats and ships were the most important form of transportation. Most Egyptians used a small boat called a skiff ②. They made this simple boat from papyrus and rope ③. People could travel short distances ④ in these boats, or they could use it for fishing. They used oars ⑤ to make the boats move. They made larger boats and ships from wood. These ships had a large sail ⑥ to catch the wind and they used oars to move and control the direction ⑦. The Egyptians built many different kinds of boats for traveling, fishing, and transporting goods.

Sherif's plan for an ideal city

1. My Ideal City ①

My city is located on the Nile River. There are new homes, schools, and a hospital. There is also a large park where people can go for walks and play sports. I believe ② that parks are important for everyone. All the electricity in my city comes from a solar energy farm in the desert. The new homes have solar panels on their roofs too. There are palm trees ③ around the houses to help them stay cooler. In my opinion ④, solar energy is better than burning fossil fuels because it is better for the environment.

2. Water Transportation

There is a great new ferry system that moves people up and down the river. The new ecological boats use both wind power and electric energy. The ferry can also use the new canals. The residents can use the ferry system to get around the town. **Personally, I think** it is very important to protect our waterways. If we use greener boats, we can do that. These ecological boats are quieter than other boats too.

3. Land Transportation

All this transportation is now more ecological. There are electric cabs, but they don't have any drivers because they are driverless. I am sure that the air will be cleaner if we use electric vehicles. We also have buses that use power from hydrogen gas. From what I know, hydrogen vehicles don't produce any dangerous gases. They only produce warm air and water vapor. You can ride your bike all around the city on the bike paths. They go along the river and everywhere else in my city.

My green city

by Hana

My ideal city is located on the Red Sea coast. There are houses and apartments, schools, two museums, and a hospital. There are a lot of green spaces where people can go for walks, ride their bikes, and enjoy being in nature. Personally, I think that green spaces are the most important part of a city. There are also large trees in all the streets to provide shade.

Transportation for goods and people

There is a system of **canals** ① in my city with bike paths next to them. I believe that more people will ride their bikes if there are more **bike paths** ②. The canals provide more outdoor spaces for people to enjoy, but they also provide transportation. Electric canal boats carry **goods** ③ **across the city** ④, so there are fewer trucks on the road. The **residents** ⑤ travel around the city on electric buses, streetcars, and cabs. All the transportation is electric so there is less pollution and the streets are quieter and cleaner.

Writing tip!

■ When you write a heading, you use capital letters for the important words. You don't have to use capital letters for conjunctions (**and, so, but**), articles (**a, an, the**), or prepositions (**to, on, in, into, for**).

■ عندما تكتب عنوان، تستخدم حروف كبيرة للكلمات الهامة. ليس لزاماً أن تستخدم حروف كبيرة للروابط (**and - so - but**). والأدوات (**a - an - the**) أو حروف الجر (**to - on - in - into - for**).

Host : Welcome back ❶, everyone. Now we are going to take calls ❷ from some of our listeners. We want to know how children get to school ❸ where you live. Are there any advantages or disadvantages? Hello, you're our first caller ❹.

Astrid : Hi, this is Astrid from the Netherlands ❶. A lot of children ride their bikes to school in my country. I think something like 75% of children actually ❷. As you might know, the Netherlands is a very flat country ❸, so it is easy Astrid to ride a bike - you don't have to go up ❹ any big hills or mountains. There are also a lot of bike paths. An advantage is that you exercise on the way to school ❺. Another advantage is that it is good for the environment. A disadvantage is the weather - the Netherlands is a very rainy country so sometimes we get wet ❻. My cousins live in Belgium ❼, and they ride bikes to school too.

Host : Thank you, Astrid. Now for our next caller.

Ethan : Hi there. I'm Ethan and I'm calling from Vermont in the United States ❶. Children here usually take a school bus. We live in the mountains, and in the winter there's a lot of snow. It's too far ❷ to walk to school if you live in the country. School buses are good because they can travel long distances and keep children safe and warm. An advantage is that the school buses can carry a lot of children at the same time ❸. A disadvantage is that they can't drive when there is a big snowstorm ❹. So, sometimes school is closed on those days ❺. Another disadvantage is that the buses use gasoline. I hope we get electric buses soon.

Boats are good here because there is a lot of water. When there are the heavy rains, called **monsoons**, the roads are even underwater and you have to use a boat. One advantage of my school boat is that every child can go to it - even if their parents don't have a boat. One disadvantage is that we don't have a playground, so we play on the boat.

Amy : Hi. My name's Amy and I live in Mackinac Island. It's a very small island in Lake Michigan in the US. It's a **popular tourist destination**. People like to take **canoe trips** on the lake in the summer, or they ride bikes around the island. The island is **unusual** because there are no cars and no buses. In winter it's very cold for 5 or 6 months and it snows heavily, so we can't ride our bikes to school like we do in summer. So, in winter we travel to school by **snowmobile**. My dad drives the snowmobile and I sit behind him. It's fun, and it's more exciting than riding a bike.

2. التآكل

Erosion ❶ is a natural process. It happens when rock and soil is moved from one place to another by water, wind, or flows ❷. The waves and currents ❸ in the sea can erode beaches, and rivers can erode riverbanks. Heavy rains or winds can also cause the land to erode ❹. Different types of flows - floods, landslides ❺, tsunamis ❻, or glaciers ❼ - also erode the land. Humans can cause erosion too. Heavy agriculture is one way that people do this. Burning fossil fuels is another way because it results in climate change. Climate change causes sea levels to rise and this results in more erosion.

Drought ❶ happens where there is not enough rain for a long time. When this happens, rivers and lakes become dry. Farmers cannot grow food and nature is in danger. When people do not have all the water that they need, we say that there is a water shortage ❷.

If we all help, we can slow climate change. We can recycle paper, plastic, and glass at home, but what can nations do? Last week, **leaders** ① from every country in the world met for the **United Nations** ② **Climate Change Conference** ③ (called COP26) in Glasgow, Scotland. They talked about what they can do to slow climate change, but this was not the first time they met. In fact, it was their 26th **meeting** ④.

Leaders from all over the world met in Glasgow, Scotland.

① القادة ② الأمم المتحدة ③ مؤتمر ④ اجتماع

On December 12th, 1995, world leaders had a very important meeting. 196 parties signed the Paris Agreement 5. The parties agreed to reduce global warming to less than 2 degrees Celsius. To do this, countries agreed to start reducing greenhouse gases 6 immediately. This was the first time that so many nations made a serious effort to slow global warming.

Another important meeting was COP25 in Madrid, Spain in 2019.

Greta Thunberg, a teenager from Sweden, asked leaders to do more to slow climate change.

After that, Thunberg became famous all over the world. This year at COP26, leaders signed a new document: the Glasgow Climate Pact. In this new pact 7, countries agreed to do several things. First, they decided to continue with the Paris Agreement. They also decided to stop using coal, a fossil fuel. Burning coal creates 40% of carbon dioxide emissions every year, so people must stop using it.

Another important topic at the meeting was transportation. Car companies agreed to stop making vehicles that use fossil fuels by 2040 so they will make more electric vehicles.

We must all slow climate change. Treaties 8 like the Paris Agreement are one way for nations to work together to do this.

4 Read the following text and answer the questions below: (4Ms)

Erosion is a natural process. It happens when rock and soil is moved from one place to another by water, wind, or flows. The waves and currents in the sea can erode beaches, and rivers can erode riverbanks. Heavy rains or winds can also cause the land to erode. Different types of flows - floods, landslides, tsunamis, or glaciers - also erode the land. Humans can cause erosion too. Heavy agriculture is one way that people do this. Burning fossil fuels is another way because it results in climate change. Climate change causes sea levels to rise and this results in more erosion.

A Choose the correct answer:

1. The waves and currents in the sea can (pollute - burn - reduce - erode) beaches.
2. Burning fossil fuels is another way because it results in (flood - climate change - drought - deforestation).

B Answer these questions:

3. When does erosion happen?

4. How can humans cause erosion?

Paragraph (1)

In 2021, archaeologists ¹ were working at a site under the Mediterranean Sea, near the north coast of Egypt. This site was the ancient city of Thônis- Heracleion.

علماء آثار ¹

The archaeologists' modern technology helped them to see what was on the bottom ② of the sea. Under five meters of clay ③ and bricks ④, they found a wooden ⑤ ship. It was over 2,200 years old.

Paragraph (2)

Thônis-Heracleion was a very old city. In the fifth century BCE, it was a very important place for sailors and for people who bought and sold things. It was the largest port in Egypt before Alexandria. However, there were lots of natural disasters ⑥ such as earthquakes ⑦ and tsunamis ⑧ at the time. About 1,200 years ago, in the eighth century CE, the city fell into the sea at Abu Qir Bay ⑨ and disappeared ⑩.

Paragraph (3)

In 2001, archaeologists discovered the city. When they dived under the water, they found lots of interesting artifacts ⑨ at the underwater site, including statues, pottery, and coins. The ship is the biggest and most exciting thing that they found there. Archaeologists often find things which are old and broken, but this ship was almost complete.

Paragraph (4)

Archaeologists think that the ship was waiting in the port next to the temple of Amun. An earthquake in about 140 BCE destroyed ⑩ the temple. Bricks from the temple fell onto the boat, making it sink ⑪. The wooden ship was a very large rowing boat ⑫ and it also had a large sail ⑬. It is about 25 meters long. It was a fast

ship and it had a flat bottom, like ships that traveled on the Nile. It was similar to the style of some ships built in ancient Egypt, so archaeologists and historians are very excited by this discovery.

The shipwreck in Abu Qir Bay is buried under clay and bricks, but you can see many other shipwrecks. The Red Sea has lots of places where divers can go down to wreck sites and explore ships under the water.

Lots of ships use the Red Sea, because it lies between Asia and Africa. It also allows ships to travel to Europe through the Suez Canal. However, there are storms, reefs, and strong currents in the Red Sea which can make it dangerous. Sometimes, ships hit the reefs and sink.

One of the oldest shipwrecks in the Red Sea is the Carnatic. It sank in 1869 when it hit the Abu Nuhas reef. It has been under water for over 150 years, and divers can explore the ship and see lots of sea animals.

Another famous shipwreck is the Dunraven, which sank in 1876. There are large holes in the boat so divers can swim inside it. Because these ships have been under the water for a long time, they have become artificial reefs. They are homes for fish, turtles, dolphins, and other sea animals. Corals live on the metal surface and there are also lots of different kinds of plants.

Unit 7

Test 1

We help to protect our environment. There are kinds of energy we can use which are renewable. They don't run out. We can get renewable energy from natural resources such as the wind, the sun, water, and heat inside the Earth. These kinds of energy don't make pollution, and, on the long run, they are better.

Question 1

Test 2

There aren't many houses or buildings in the rural environment, so this place often has more animals and plants. Not many people live here, so it is sparsely populated. It is a quiet place to live. The urban environment is densely populated. Most people in the world live in this kind of environment. There are lots of buildings, and there can be a lot of traffic, too.

Question 2

Unit 8

Test 1

Near Aswan, you can see the temples of Abu Simble. Outside the temples, there are some very big statues of Ramses II and his wife Nefertari. Twice a year, people celebrate the Abu Simble Sun Festival there, on February 22nd. On these days, light from the sun at sunrise shines all the way inside the main temple, to the room inside. There are four statues inside the temple.

Question 1

Test 2

A traditional Egyptian meal is served with people sitting together around a table. A typical meal has rice, a kind of vegetable stew, soup, stuffed vegetables, and meat or chicken. Egyptians are very generous and are very happy when you ask for more food. This means you enjoyed their delicious meal!

Question 2

Unit 3

Test 3

Luxor is full of different monuments from ancient Egypt. Many tourists visit Luxor from a Nile River cruise. They can see the Temple of Karnak and the Valley of the Kings. Ancient Egyptians buried their kings and queens here for thousands of years. You can see lots of paintings and engravings in the temples. There are lots of other amazing things to see in Egypt.

Question 1

Test 3

Agriculture is an important part of Egypt's heritage, too. The Nile used to flood every year, making the soil more fertile. This is why ancient Egyptians could farm the land and it led to a growth in civilization. There were three seasons of farming in ancient Egypt, which were all connected to the Nile.

Question 2

Unit 4

Test 4

An email is a digital form of a letter. We send these electronic messages to people using electronic devices. You must have an email account to send these kinds of messages. An instant message (or IM) is a message that you can send on a social media platform. It is a private message so no one else can see it except the person you send it to.

Question 4

Test 4

As a fourth-grade student, I like to write short stories and reports about things that I think are interesting. I write for my projects and for fun. I don't have time to write in the morning, but I do have time to write after school. Some of my friends are also interested in writing after school. So, that's why I think that an after-school club is a perfect idea.

Question 2

Unit 1

Test 1

I love my city but every morning we have to sit in a traffic jam on my way to school. The cars and buses stop, and we can't move. The trip to school sometimes takes us an hour! The traffic lights are often red and that makes the traffic even worse. We leave home very early so I can make it to school on time. I can't make the trip on foot because my school is too far to walk to.

Question 1

Test 2

The problem with transportation that uses gasoline is that it burns fossil fuels, and these are bad for the environment. So today, people are developing cleaner forms of transportation like electric cars. There are even electric buses that use some solar energy from solar panels on their roofs. Engineers are designing greener airplanes and ships, too.

Question 2

Unit 2

Test 3

Climate change affects everyone living on our planet, so we need to try to slow it by working together. Nations are now making plans to work on this problem.

We can recycle paper, plastic, and glass at home, but what can nations do? Last week, leaders from every country in the world met for the United Nations Climate Change Conference. They talked about what they can do, but this was not the first time they met. In fact, it was their 26th meeting.

Question 3

Test 4

Drought happens where there is not enough rain for a long time. When this happens, rivers and lakes become dry. Farmers cannot grow food and nature is in danger. When people do not have all the water that they need, we say that there is a water shortage.

Erosion is a natural process. It happens when rock and soil is moved from one place to another by water, wind, or flows. The waves and currents in the sea can erode beaches and rivers can erode riverbanks. Heavy rains or winds can also cause the land to erode. Different types of flows - floods, landslides, tsunamis, or glaciers - also erode the land. Humans can cause erosion too. Heavy agriculture is one way that people do this. Burning fossil fuels is another way because it results in climate change. Climate change causes sea levels to rise and this results in more erosion.

A Choose the correct answer.

Subject: renewable and non-renewable energy

Dear Manar

How are you? There are many types of environments in our country, and we can use different natural resources in different places. For example, in the desert, there are large farms with lots of solar panels that can make clean electricity. A coastal environment can get a lot of wind, so some places have a lot of wind turbines in the sea, close to the coast. In some places, we can use tidal energy from the moving water to make electricity. We also use some non-renewable energies like oil, gas and coal. But renewable energies are much better. See you soon.

Yours,

Esraa

Subject: keeping our environment clean

Dear Ahmed,

How are you? I want to tell you what you have learned to keep your environment clean. I learned a lot about creating a cleaner environment. It's important to have green spaces in a city. The air is cleaner there. People are happier when they have green spaces. So, we need more parks and trees in our cities. If we need to water these green spaces, we can recycle water. One of the best things we can do is to use recycling bins for our glass, paper, plastic, and metal. And I learned that in some places, people volunteer to pick up garbage in parks. See you soon.
